Percentage of Dwelling that is occupied by usual residant

Yujia Huang

2026-10-06

Introduction

I used the 2021 Canadian Census data on Total private dwellings to study the percentage of dwellings that is occupied by usual residents in regions in British Columbia.

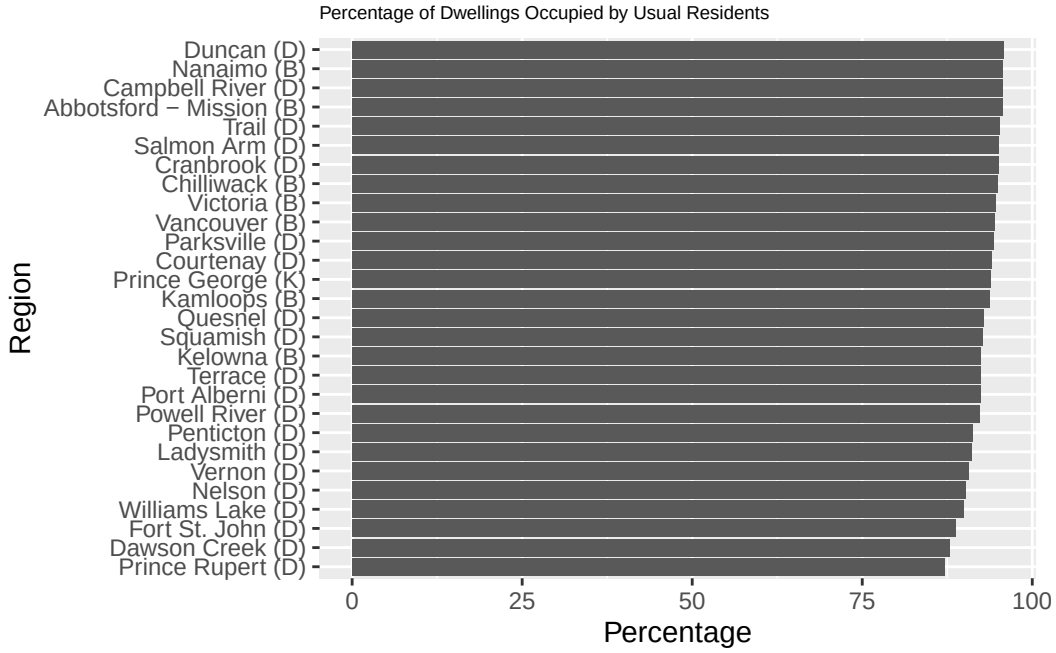
Calculate the Percentage

The table show the top 15 regions with the least percentage of dwelling that is occupied by usual residents.

```
# A tibble: 15 x 2
   `Region Name`     percentage_occupied
   <fct>                           <dbl>
 1 Prince Rupert (D)                87.0
 2 Dawson Creek (D)                 87.9
 3 Fort St. John (D)                88.8
 4 Williams Lake (D)                89.9
 5 Nelson (D)                       90.2
 6 Vernon (D)                       90.7
```

```
 7 Ladysmith (D)                 91.1
 8 Penticton (D)                 91.2
 9 Powell River (D)              92.2
10 Port Alberni (D)              92.4
11 Terrace (D)                   92.4
12 Kelowna (B)                   92.4
13 Squamish (D)                  92.8
14 Quesnel (D)                   92.8
15 Kamloops (B)                  93.8
```



Conclusion

The graph shows that Prince Rupert, Dawson Creek and Fort St. John have the least percentage of dwellings that are occupied by usual residents. And in most of the British Columbia, over 90% of dwellings are occupied by the usual resident.
